## Technical Skill Summary

---

In the past five years, I have developed the following while on Version Control Systems such as Git and Team Foundation Server:

- Web applications with C# .NET / VB.NET as the backend; AngularJS and JavaScript libraries as the frontend; and third-party web services that have their own storage architecture.
- Web applications with Ruby on Rails as the backend; HTML, CSS and JavaScript as the frontend; and PostgreSQL as the database.
- Enterprise-sized applications with C# .NET WinForms; WebForms and JavaScript as the frontend; and SQL Server as the database.
- Android mobile application with a third-party RPC-JSON web service; and SQLite as the database.
- Web application with PHP as the backend; HTML, CSS and JavaScript as the frontend; and MySQL as the database.

## Professional Experience

---
