

Jenny Nguyen

Full-stack Developer • Sydney, AU • jenny.ngoc.lan@gmail.com

I have over four years of experience in developing back-end and front-end features for global companies in the logistical, sales and marketing and finance fields.

Technical Skill Summary

In the past four years, I have developed the following while on Version Control Systems such as Git and Team Foundation Server:

- Web applications with C# .NET / VB.NET as the backend; AngularJS and JavaScript libraries as the frontend; and third-party web services that have their own storage architecture.
- Web applications with Ruby on Rails as the backend; HTML, CSS and JavaScript as the frontend; and PostgreSQL as the database.
- Enterprise-sized applications with C# .NET WinForms; WebForms and JavaScript as the frontend; and SQL Server as the database.
- Android mobile application with a third-party RPC-JSON web service; and SQLite as the database.

Professional Experience

1

Software Developer @ SMASH! Sydney, Nov 2017 - Present

SMASH! Sydney is one of the largest anime, manga and games conventions in Australia.

Significant Project

- Developing the statistics report for the existing ticketing system using Ruby on Rails.

Duties

- Advise the IT Director on general technical matters.
- Ensure continued performance and operation of the software with automated testing.

2

Analyst Programmer @ Prosegur Australia, Sep 2017 - Present

Prosegur Australia provides secure cash management solutions to large enterprises like the Big Four banks and small and medium companies like gyms and pubs.

Significant Projects

- Developing the web desktop interface of a webservice using C#, VB.NET and AngularJS.
- Developing mobile-friendly web application using C#, AngularJS and JavaScript libraries.

3

Junior Developer @ WiseTech Global, Dec 2012 - Dec 2016

WiseTech Global develops leading enterprise software in the logistics field and has over 6,000 customers in over 125 countries.

Significant Recent Projects

- Refactored the Human Resources module using SOLID principles and Test Driven Design using C# .NET WinForms.
- Documented the Human Resources module for the incoming Human Resources product manager to peruse and for knowledge transfer to other developers.

I acted as a liaison between the University of Technology, Sydney (UTS) and Google. I planned and hosted events with UTS clubs on campus, and helped Google understand my university better.

Education Background

- Bachelor of Science in Information Technology, Diploma in Information Technology Professional Practice @ University of Technology Sydney, Jun 2017
- Front-End Web Development @ General Assembly, Jun 2017

Extracurricular Activities

1 Vice President @ UTS Programmers' Society, Oct 2017 - Present

UTS Programmers' Society is a group dedicated to sharing information and resources in order to encourage learning in Information Technology, particularly in the area of programming, by hosting a variety of ongoing projects and events.

Duties

- Manage the social media pages like [Facebook](#) and [Twitter](#).
- Support other executive members, such as the President, in projects, events and initiatives.
- Observe and promote the society's objects that can be found on [the ProgSoc Constitution wiki webpage](#).

2 Senior Student / Teacher Assistant @ Lam Tu Luan Kungfu School, Mar 2012 - Dec 2016

Lam Tu Luan Kungfu School is recognised as Brisbane's premier training academy, and offers a non-competitive training environment by combining music and modern day equipment with the traditional techniques and disciplines of Jow Ga Kungfu.

Duties

- Taught students techniques, applications and forms/patterns/kata.
- Assisted the teacher in organising classes.
